<td>Kurzbeschreibung des Inhaltes</td>
<td>The development of the Ruhr area illustrates that regional innovation and transformation is a most challenging task. The module aims at a better understanding of regional innovation – its supporting and hindering mechanisms. Students gain deeper insight in theoretical outlines on regional innovation systems, regional dynamic capabilities and underlying institutional mechanisms. They learn to understand a region as an ecosystem with different counteracting dynamics where universities and/or institutional entrepreneurs might play a pivotal role for regional transformation and a more entrepreneurial culture.</td>
</tr>
<tr>
<td></td>
<td>The module moreover aims at an illustration of regional innovation by analyzing and comparing the development of different regions. This also includes an exploration and reflection of the WorldFactory® concept of the Ruhr-University. Moreover, students are encouraged to bring in examples from regions they are familiar with and where they have access to documents underlying the transformation process. The module invites student from all over the world to participate in a discourse on</td>
